Breeder proclaims that sells the puppy to new owner in good health and nourishing condition, the puppy does not appear any symptoms of common dog infection diseases and any presence of internal nor external parasites. The puppy has been dewormed and vaccinated according to records in enclosed pet passport.

Breeder guarantees puppy's health for 42 days from taking over by new owner in condition of holding on recommended vaccination way. Breeder recommends new owner as soon as possible to do introductory examination at a dog specialist in home place and besides other things to agree on next vaccination way according to risk of infection against canine distemper, infections hepatitis, infection leryngotracheitis, parvovirus, parainfluenza, coronary viral disease, leptospirosis, rabies, Lyme borreliosis, eventually tetanus. If common dog infection disease would appear towards that the puppy has started vaccination at breeder and continue in new home during guarantee time then new owner has claim to return money in full price against to return the puppy. In cases of death on common dog infection disease, congenital or hereditary defect during guarantee time, new owner has claim to return money in full price. Cases of death should be documented by dissection in an accredited veterinary laboratory.

Breeder recommends new owner to give to examine puppy hips, elbows and eyes on hereditary defects after year of age. To check up puppy exterior by dog shows and features by trials. New owner would give information about puppy evolution and health to breeder ask.

New owner pledges to protect puppy against anything what would be regarded as animal maltreatment. New owner should accept fact that retrievers are family dog hating loneliness.

New owner is responsible for damages done by puppy and injuries on puppy after taking from breeder if damages and injuries do not arised exactly before taking from.

Puppy's salling or giving to third person needs breeder's agreement.
